GLOBAL COMPETENCY

Goal: An HCC student has an awareness of the wider world and their relationship to it.

Objectives: After completion of an approved course, an HCC student demonstrates global competency by meeting the following objectives::

1. Describe an issue and its legacy from a global perspective.
2. Discuss how human experience is shaped by global forces.
3. Analyze the interconnectedness of global events and/or global systems.

	4 Exceeds Objective	3 Meets Objective	2 Does Not Fully Meet Objective	1 Does Not Meet Objective
Describe an issue and its legacy from a global perspective.	Thoroughly describes an issue and its past, present and/or future causes and effects from a global perspective.	Describes an issue and its past, present and/or future causes and effects from a global perspective.	Inadequately describes an issue, and does not describe its past, present and/or future causes and effects from a global perspective.	Fails to describe an issue and its past, present and/or future causes and effects from a global perspective.
Discuss how human experience is shaped by global forces.	Thoroughly explains the global forces and articulates the complexity of how they affect specific elements of the human experience.	Explains the global forces and articulates how they affect specific elements of the human experience.	Identifies basic global forces, but does not explain the connection between elements and human experience.	Fails to explain global forces and the connection between elements and human experience.
Analyze the interconnectedness of global events and/or global systems.	Thoroughly analyzes the interconnectedness of global events and/or global systems with sufficient evidence.	Analyzes the interconnectedness of global events and/or global systems with sufficient evidence.	Inadequately analyzes the interconnectedness of global events and/or global systems without evidence.	Fails to analyze the interconnectedness of global events and/or global systems.

Developed: Fall 2018
